**USING
THE
MUSIC PLAYER**

MUSIC PLAYER

Your Hammond Sk-series instrument has the ability to play Music Files in one of two formats:

1. .WAV 44.1kHz 16-bit
2. .MP3 44.1kHz 64 ~ 192kbps

You can listen to the Music Files (or “Songs”) as they play, add vocals or other instruments to them live (“karaoke”), or play the SK along with them.

NOTE: If you wish simply to play a Song, the .MP3 format will be adequate; however, if you wish to play along on the SK with the Song, the .WAV format is recommended, as .MP3 files may “stutter” or play intermittently if keys or Touch Tabs are pressed during playback.

◆ MUSIC PLAYER Controls

The controls for the Music Player are located on the left side of the Control Panel next to the MASTER VOLUME Rotary Control.

VOLUME Rotary Control

This Rotary Control allows you to control the volume of the Song being played by the Music Player. Use this control in conjunction with the MASTER VOLUME Rotary Control, particularly if you wish to play the SK along with the sound file.

SONG Touch Tab

This Touch Tab allows you to select the Song you wish to play if multiple song files are stored on your USB Flash Drive.

PLAY/PAUSE Touch Tab

This Touch Tab allows you to start playback of a Song as well as to pause the Song in the midst of playback.

◆ Using the Music Player

In order to play Song files using the Music Player, a USB Flash Drive containing compatible Song data must be inserted into the USB Port on your Sk-series instrument. The next few pages will explain more about this.

Copying a Music File to a USB drive

1. Insert a USB Flash Drive that has been previously formatted for use with the Sk-series instruments into an open USB Port on your computer.
2. Find any audio files with either the “.wav” or “.mp3” extension you wish to copy.
3. Copy the files from your source location (usually a hard drive) to the following folder on the USB Flash Drive:

\hammond\sk\audio\

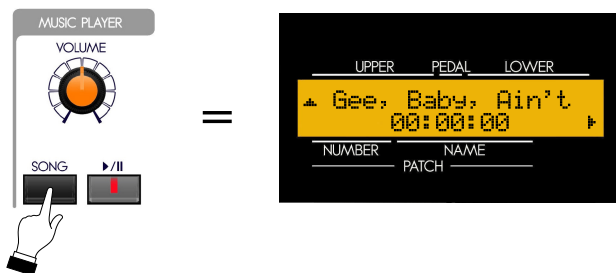

NOTE: The number of files may vary according to the size of the files. Numerically, up to 99 files can be stored.

Playing a Music File

1. Insert a USB Flash Drive to which you have copied audio files using the procedure described above into the USB Port. The bottom line of the Information Center Display will scroll the following:

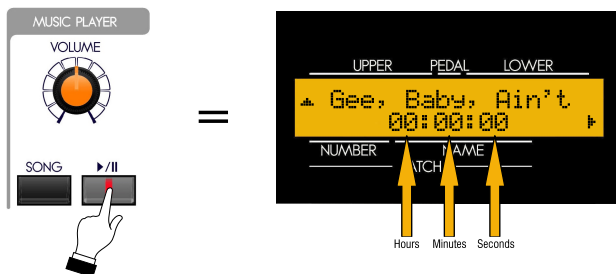

Confirming USB. Please wait...

2. After the above message stops scrolling, touch the SONG Touch Button in the MUSIC PLAYER Section of the Control Panel. The Information Center Display should now look similar to this:

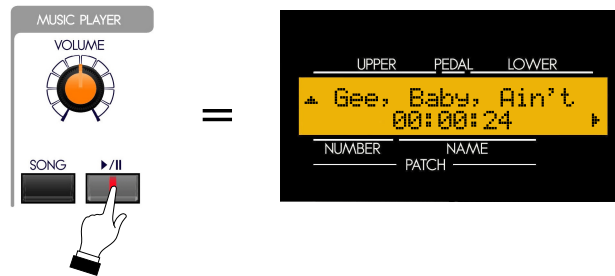

A Song Name will now display.

3. If you wish to play the Song whose name is currently displaying, touch the PLAY Touch Button.

The currently selected Song will start playing. As the song plays, the bottom line OF THE DISPLAY WILL FUNCTION AS A Time Counter displaying hours, minutes and seconds.

4. To pause the Song during playback, touch the PLAY Touch Button while the Song is playing.

The Time Counter on the bottom line of the display will stop its count and the Song will be paused.

5. To start the song playing from the currently selected time, touch the PLAY Touch button again.

To start the Song playing from the beginning, touch the SONG Touch Button, then touch the PLAY Touch Button. The Song will start playing again from the beginning.

Playing Multiple Songs

When the Information Center Display is showing Song names, you may see an “UP” arrow (“▲”) on the extreme left of the upper line of the display. This indicates multiple songs on the USB Flash Drive (see the figure above).

NOTE: If no arrow appears, only one Song is available for playback on the MUSIC PLAYER.

To scroll up through the Song names, touch the PAGE UP Touch Button to display each Song.

The symbol displayed in the upper left corner will depend on the number of songs available. If only two Song files are available, a DOWN arrow (“▼”) will show. If there are three or more Songs, you will see an UP/DOWN arrow (⬆) in the upper left corner of the display. When you have reached the end of the Song list, a DOWN arrow will display.

To scroll down through the song names, touch the PAGE DOWN Touch Button to display each Song.

The UP arrow will show in the upper left corner when you have reached the start of the Song list.

The MUSIC PLAYER allows you to “chain” multiple Music files in several ways. The data chart below shows the options you may select.

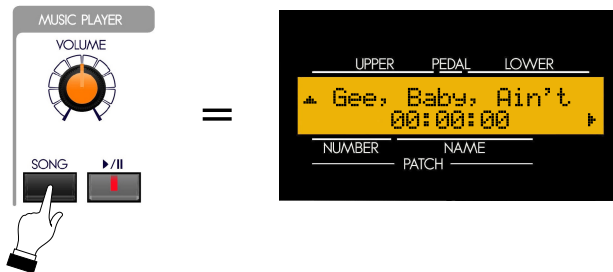

MUSIC PLAYER CHAIN Options	
Description	Function
ALL	Plays all Songs on the USB Flash Drive in alphabetical order.
ONE	Plays the currently selected Song, then stops.
SHUF	The order of the Songs is “shuffled” - the Songs are played in random order.

To select one of the above options, do the following:

1. Insert a USB Flash Drive to which you have copied audio files using the procedure described above into the USB Port. The bottom line of the Information Center Display will scroll the following:

Confirming USB. Please wait...

2. After the above message stops scrolling, touch the SONG Touch Button in the MUSIC PLAYER Section of the Control Panel. The Information Center Display should now look similar to this:

A Song Name will now display.

3. Touch the PAGE RIGHT Touch Button **once**. The Information Center Display should now look similar to this

Turn the VALUE Rotary Control to make your selection.

Determining Song Order

On the Sk-series MUSIC PLAYER, the order in which the Songs play is determined by the first character of the File name. Numbers have priority over letters - for example, if a file is named "2002" and another file is named "A Tisket A Tasket," the file "2002" will be listed ahead of the other file and will play first if the Songs are played in order (if the CHAIN Advanced Feature is set to "ALL.")

If you have a selection of Songs that you want to play in a particular order, it is recommended that you manually rename the files using the File Rename feature of your computer. It is further recommended that you use numbers in front of the Song name so that the Songs will play in the order you want if the titles are not in alphabetical order. Here is an example:

- 00-Them Changes.mp3
- 01-Keep Rockin'.mp3
- 02-Bein' Green.mp3
- 03-In the Heat of the Night.mp3
- 04-Calling Me Home, Chicago.mp3
- 05-September Moan.mp3

In the above example, the numbers are separated from the song names by a hyphen (-); but this is not necessary - an underscore or space can also be used, or you may prefer not to separate the numbers and names at all. It is recommended, however, that you preface each number with "0" as shown above so that songs with two numbers in the file name ("12," "32," etc.) will play in the correct order.
