

HAMMOND USA ANNOUNCES NEW LESLIE PRODUCTS

Hammond Organ USA announces the release at the 2013 Winter NAMM of a series of new Leslie Speakers, and the first-ever Digital Leslie Pedal.

Joining the line is the smallest-ever dual-rotor Leslie intended for general applications, The Leslie Studio 12. It is the same size and weight as the popular G37 Guitar Leslie with which it shares a common cabinet. Keyboard players have asked for an ultra-portable Leslie that had a true Leslie Horn and Rotor, and Hammond has delivered their wish.

With a tube preamp driving a 100 watt solid state power amp, the Studio 12 is at home on the Rock and Roll stage and Jazz club alike. Its ¼" input allows any instrument to connect, and a standard footswitch handles fast and slow speeds. Leslie's exclusive "Gas Pedal", which allows custom Leslie speeds and expressive swells may be fitted to the Studio 12.

Finally, a bevy of new and vintage finishes come to the traditional Leslie line. The classic Provincial finish returns, as does Cherry. Black, White and distressed finishes are available as well. Like all traditional Leslie cabinets, including the G37 and the new Studio 12, select electronics and woodworks are all hand-built in the USA.

Available February 2013

HAMMOND

THE SOUND THE SOUL THE ONE

Leslie®

STUDIO 12

Single-Channel Input	Features 2 inputs one for low gain for keyboards and high gain for guitar.
Two-Speed Horn & Bass Rotor	Slow/fast speeds can be individually adjusted. Horn and bass rotor will automatically stop in the forward position when the stop mode is selected. This maximizes the sound towards the audience.
Amplifier	Vacuum tube preamp with a 100-Watt solid-state power amplifier.
Speakers	Bass Speaker is 12" Eminence speaker matched to the bass chamber. Horn driver is the same driver designed and used in all Leslie speakers for keyboards.
Control Inputs	Channel Select foot switch, speed select foot switch (slow, fast, stop) or speed control adapter cables 11-pin or 8-pin. Variable speed control pedal input for optional (V-20RT).
Controls	Clean Volume, Ch Select, Overdrive: Gain, Volume, Contour Equalizer: Treble, Mid, Bass Slow rotor speed: fast rotor speed, power switch
Cabinet	Rugged-built, black painted cabinet with protective corners and two folding handles.
Power Supply	120V AC, 60Hz
Dimensions	29 1/4"(W) x 20 1/2"(D) x 26 3/4"(H)
Weight	85 lbs
Included Accessories	FS-10TL speed control
Optional Accessories	FS-1TL single foot switch used to remotely control channel select. V-20RT speed control pedal Adapter cable 11-pin to 1/4" or 8-pin to 1/4"
