

# Leslie® STUDIO 12

Keyboard players have asked for an ultra-portable Leslie with a true Leslie Horn and Rotor, and Hammond has delivered.

The Studio 12, with a tube preamp driving a 100 watt solid state power amp, is at home on the Rock and Roll stage and Jazz club alike.

Its ¼" input allows any instrument to connect, and a standard footswitch handles fast and slow speeds. Leslie's exclusive "Gas Pedal", which allows custom Leslie speeds and expressive swells may be fitted to the Studio 12.

The Studio 12 is available in a high-impact black finish, or the traditional Leslie cabinet in walnut veneer

STUDIO 12W
